COLOR MASTERBATCH

Color masterbatch has high pigmentation, excellent dispersion, high heat resistance and light fastness properties. Upon request, color masterbatch can be produced with different effects, such as Opaque, Translucent and Transparent, Mono, Metallic, Pearlescent, Glitter, Micro Fiber and Fluorescent. When getting prepared for coloring works, we adopt a coordinated approach to offer creative solutions that cater for your functionality and harmony needs. This coordinated approach allows us to understand our customers' technology, needs and product lines. With the ideas we exchange mutually in masterbatch production, we do not only offer you the most affordable and optimal solution, but also enjoy pushing our limits. Along with standard colors, we produce fast and effective solutions with our special coloring works that will meet your demands exactly. We use international catalogues (Ral, Pantone etc.), the finished product pieces or and masterbatch samples to make our customized colors.

HIGHLIGHTS:

- ☐ MICRO-GRANULE MASTERBATCH (For PE)
- ☐ POWDER DRY MIX
- ☐ PULVERIZED MASTERBATCH
- ☐ COMBINATION MASTERBATCH
- ☐ PULVERIZED ROTO MOLDING COMPOUND
